

This is my House

I am going to describe to you my house. When you arrive at my house, you walk through the front lawn to get to the entrance. I knock on the door, and someone opens. I enter, and on the left is the half bath. Many of our visitors use it often. Looking ahead on the hallway you see the stairs where I go up to the second floor. Under them is the storage room where we put all of our sports equipment, Christmas things and other things that we don't use much. We walk through the hallway and we enter the living room. There is a three person couch and two armchairs next to the fireplace. In the center, there is a coffee table with a vase in the middle and other decorations. A large mirror is placed over the fireplace. The walls are yellow and the curtains green, and these cover the windows.

The room to the right is the dining room. Here, there is a dining table with eight chairs around it. The tablecloth is blue and white. At night, my family has dinner under the light of candles that are placed on candle holders. The walls have some beautiful paintings from famous artists.

From here we go to the kitchen, where we like to be because there is a lot of food. Every day, the maid takes out the food from the refrigerator and the pantry, and prepares an spectacular dinner. She uses the oven and the stove to cook, but she doesn't use the microwave oven because she doesn't like the flavor it gives. She uses many pots and plates, and washes them in the kitchen sink. She does not like use the dishwasher because likes to wash them herself. In general, I have breakfast in the kithchen table because it is fairly informal. The maid puts for us various things on the counter so we can choose what we want to eat.

Since we are several in my family, we have a lot of dirty clothes. Mi mom takes the dirty clothes to the laundry room that is located behind the kitchen. She puts the clothes in the washer, and when it is done, she moves it to the dryer. Since the maid does not live at home, we use the maid's room to put the clean laundry that we need to iron and fold. The maid's bathroom is used by the maid when she is here.

When we go up to the second floor, there is a hallway that takes us to three bedrooms. One is for my brother and me, another one is for my older sister, and the other one is my parent's. In my bedroom there are two single beds, one for my brother and one for me. In between them, there is a night stand with a lamp that gives us light and an alarm clock to knw the time. In front, we have a small television set where we can play our favorite video games. The closet is small for all the things that my brother and I have. My sister's

bedroom is in front of mine. She has a double bed and two night stands on both sides of the bed with two lamps on them. My sister has a couch in her room for when her girl friends come to visit. She does not have a television, but she has a stereo with two speakers that are heard lightly when you turn it on. She likes modern music a lot and she likes to dance.

Our bathroom is between the two rooms and sometimes we fight for who is going to use it first. She has many things next to the bathtub. I don't use the bathtub much, and I want to shower fast. On the bathroom sink, we have several types of soaps for the hands and the face, because my sister likes the different odors. When someone uses the toilet, he always flushes because we don't like to keep it dirty nor with odors. Sometimes my brother does not flush the toilet and we scream at him. We don't have a vanity here, because the bathroom is small, so the vanity is in my sister's room because only she uses it.

At the end of the hallway is the master bedroom that is where my parents sleep. The room is very big and has a king size bed, and all of us like to get in there together to watch television on Sunday mornings. The heat in my parent's bedroom is very pleasant, especially on the cold winter days. In the summer, they turn on the air conditioner and they keep their room fresh. The master bathroom is inside the room, so they don't have to use my brother's and mine.

In my house we don't use the attic that is above. Well, we use it to store things, that's it. In other houses, like some of my friends', they have the attic organized like a game room. My father said that he wanted to fix it and make it a study where we can study, and have a big computer on a desk. He saw a computer on a magazine and he wants to buy it. The computer has a keyboard, a monitor and a mouse, and if we buy it before Monday, they will give us a printer. This would be perfect for our school work.

Under the house, in the basement, we have a family room, which is where we spend a lot of time as a family. There, there are two big couches, a 65-inch television set, several game consoles, and a stereo with four speakers where we listen to music and television. There also is a rocking chair where my grandmother sits when she visits. Here, we have a fan that gives us air, and a heater that gives us heat when we need them. I like to take there my laptop and my headphones to chat with my friends online and watch YouTube videos.

Outside the house, in the front lawn, we play many sports and we make up several games. My mom likes gardening, so she likes to take care of her plants. The plants around the house have very beautiful flowers. The garage is to the right of the house, and we put our two cars there. Very soon, my sister will have a car that she will have to park on the street.

This is my house. I hope you have enjoyed it.
